get_sample_ages	<i>Get Sample Ages</i>
-----------------	------------------------

Description

Extracts sample ages from a data frame containing dataset and sample info.

Usage

```
get_sample_ages(data = NULL)
```

Arguments

data A data frame. Must contain the columns ‘dataset_name’ and ‘data_samples’.

Details

Validates the input data frame, ensures required columns are present, and extracts sample ages by unnesting the ‘data_samples’ column.

Value

A data frame with columns ‘dataset_name’, ‘sample_name’, and ‘age’.
