| <i>Make Community Data Long</i> |

Description

Converts community data from wide format to long format.

Usage

```
make_community_data_long(data = NULL)
```

Arguments

data A data frame. Must contain 'dataset_name' and 'sample_name' columns.

Details

Uses 'tidyr::pivot_longer' to reshape the data, dropping NA values in the process.

Value

A data frame in long format with columns 'dataset_name', 'sample_name', 'taxon', and 'pollen_count'.
