get_abiotic_data	<i>Get Abiotic Data</i>
------------------	-------------------------

---

## Description

Extracts abiotic data from a data frame containing nested abiotic information.

## Usage

```
get_abiotic_data(data = NULL)
```

## Arguments

data                      A data frame. Must contain the columns ‘dataset\_name’ and ‘data\_abiotic’.

## Details

Validates the input data frame, ensures required columns are present, and unnests the ‘data\_abiotic’ column.

## Value

A data frame with columns ‘dataset\_name’, ‘sample\_name’, ‘abiotic\_variable\_name’, and ‘abiotic\_value’.
