check_and_prepare_data_for_fit

Check and Prepare Data for Model Fitting

Description

Cleans and prepares community, abiotic, and coordinate data for HMSC model fitting, with optional age subsetting.

Usage

```
check_and_prepare_data_for_fit(
  data_community = NULL,
  data_abiotic = NULL,
  data_coords = NULL,
  subset_age = NULL
)
```

Arguments

data_community	Data frame of community data.
data_abiotic	Data frame of abiotic data.
data_coords	Data frame of coordinates.
subset_age	Optional age value to subset data.

Value

A list of cleaned and prepared data frames for model fitting.
