interpolate_community_data

Interpolate Community Data

Description

Transforms community data to proportions, interpolates it, and returns it.

Usage

```
interpolate_community_data(data, ...)
```

Arguments

data   A data frame containing community data to be transformed and interpolated.

...   Additional arguments passed to the 'interpolate_data' function.

Details

Transforms data to proportions using 'transform_to_proportions' and total pollen count from 'get_pollen_sum'.
Then interpolates using 'interpolate_data'.

Value

A data frame with interpolated community data.
