replace_na_community_data_with_zeros

Replace NA in Community Data with Zeros

Description

Replaces NA values in community data with zeros.

Usage

```
replace_na_community_data_with_zeros(data = NULL)
```

Arguments

data   A data frame. Must contain 'dataset_name' and 'sample_name' columns, and
                at least one taxon column.

Details

Converts the data to long format, replaces NA values in 'pollen_count' with zeros, and reshapes it
back to wide format.

Value

A data frame with NA values replaced by zeros.
