## Contents

---

make_community_data_long

*Make Community Data Long*

---

### Description

Converts community data from wide format to long format.

### Usage

```
make_community_data_long(data = NULL)
```

### Arguments

data          A data frame. Must contain 'dataset_name' and 'sample_name' columns.

### Details

Uses 'tidyr::pivot_longer' to reshape the data, dropping NA values in the process.

### Value

A data frame in long format with columns 'dataset_name', 'sample_name', 'taxon', and 'pollen_count'.
