add_age_to_samples | *Add Age to Community Data*

Description

Merges community data with age data based on dataset and sample names.

Usage

```
add_age_to_samples(data_community = NULL, data_ages = NULL)
```

Arguments

data_community A data frame containing community data. Must include 'dataset_name' and 'sample_name' columns.

data_ages A data frame containing age data. Must include 'dataset_name' and 'sample_name' columns.

Details

Performs a left join between community data and age data using 'dataset_name' and 'sample_name' as keys.

Value

A data frame with community data merged with the corresponding age data.
