run_pipeline_interpolation_prebuild
Run a Pipeline Interpolation Prebuild

Description

Repairs failed interpolation targets and prebuilds shared interpolation branches with the configured preprocessing workers.

Usage

```
run_pipeline_interpolation_prebuild(pipeline_script, pipeline_store, workers)
```

Arguments

pipeline_script Path to the selected targets pipeline script.
pipeline_store Path to the selected targets store.
workers Positive integer number of preprocessing workers.

Value

‘NULL’, invisibly. The function is called for targets side effects.
