apply_decomposition_scale_attributes
<i>Apply Decomposition Scale Attributes</i>

Description

Applies training-set scale attributes to held-out predictor rows.

Usage

```
apply_decomposition_scale_attributes(  
  data_predictors = NULL,  
  scale_attributes = NULL  
)
```

Arguments

- data_predictors
Data frame with row names and predictor columns.
- scale_attributes
Named list of scale attributes from 'scale_abiotic_for_fit()' or 'scale_spatial_for_fit()'.

Value

Data frame with the same row names as 'data_predictors' and scaled columns ordered as 'scale_attributes'.
