format_count	<i>Format Count Values</i>
--------------	----------------------------

Description

Formats numeric count values for slide text and figure labels using grouping separators.

Usage

```
format_count(x, accuracy = 1, big_mark = ",")
```

Arguments

x	Numeric vector of values to format.
accuracy	Numeric scalar passed to [scales::number()] to control rounding.
big_mark	Character scalar used as the thousands separator.

Value

Character vector with formatted count values.

Examples

```
format_count(12345)
```
