get_abiotic_data	<i>Get Abiotic Data</i>
------------------	-------------------------

Description

Extracts abiotic data from a data frame containing nested abiotic information.

Usage

```
get_abiotic_data(data = NULL)
```

Arguments

data	A data frame. Must contain the columns ‘dataset_name‘ and ‘data_abiotic‘.
------	---

Details

Validates the input data frame, ensures required columns are present, and unnests the ‘data_abiotic‘ column.

Value

A data frame with columns ‘dataset_name‘, ‘sample_name‘, ‘abiotic_variable_name‘, and ‘abiotic_value‘.
