| <i>Get Decomposition Route Sample IDs</i> |

---

## Description

Selects sample IDs for one decomposition diagnostic route.

## Usage

```
get_decomposition_route_sample_ids(route = NULL, inputs = NULL)
```

## Arguments

|        |                                                                                     |
|--------|-------------------------------------------------------------------------------------|
| route  | One-row route data frame or named list from 'make_decomposition_diagnostic_routes'. |
| inputs | List returned by 'load_decomposition_diagnostic_inputs'.                            |

## Value

Data frame with 'dataset\_name', 'age', and 'row\_name'.
