| scale_colour_oracle_discrete                          |
| <i>Discrete colour scale using the ORACLE palette</i> |

---

## Description

Maps discrete data values to ORACLE categorical colours using ‘ggplot2::scale\_colour\_manual()’.

## Usage

```
scale_colour_oracle_discrete(values = get_oracle_discrete_palette(), ...)
```

## Arguments

|        |                                                                                 |
|--------|---------------------------------------------------------------------------------|
| values | Named character vector of colours. Defaults to ‘get_oracle_discrete_palette()’. |
| ...    | Additional arguments passed to ‘ggplot2::scale_colour_manual()’.                |

## Value

A ‘ggplot2’ scale object.

## Examples

```
## Not run:
ggplot2::ggplot(mtcars, ggplot2::aes(wt, mpg, colour = factor(cyl))) +
  ggplot2::geom_point() +
  scale_colour_oracle_discrete()

## End(Not run)
```
