summarise_spatial_variance_stack
<i>Summarise Spatial Variance Stack</i>

Description

Computes mean component percentages and an unexplained component for stacked spatial variance-partitioning figures.

Usage

```
summarise_spatial_variance_stack(data_plot, vec_component_levels)
```

Arguments

data_plot	Data frame returned by [prepare_spatial_variance_plot_data()].
vec_component_levels	Character vector giving the display order of variance components. Must include "Unexplained".

Value

A tibble with one row per scale, resolution label, and component label.
