assess_sjsdm_staged_benchmark

Assess the Paired sjSDM Staged Benchmark

Description

Compares paired exhaustive and staged benchmark repetitions against the frozen issue 138 runtime, resource, technical, and scientific gates.

Usage

```
assess_sjsdm_staged_benchmark(  
  data_benchmark_runs = NULL,  
  list_policy = get_sjsdm_staged_benchmark_policy()  
)
```

Arguments

<code>data_benchmark_runs</code>	One row per strategy and benchmark repetition containing measured resources, fit counts, predictive metrics, technical hashes, and selection evidence.
<code>list_policy</code>	Named list containing the versioned issue 138 acceptance thresholds. Defaults to <code>[get_sjsdm_staged_benchmark_policy()]</code> .

Value

A named list containing paired comparisons, criterion-level gate results, and a one-row benchmark decision.
