---

## Description

Internal helper that preserves the response preparation performed by ‘fit\_jsdm\_model()’.

## Usage

```
.prepare_sjsdm_response(  
  data_community = NULL,  
  error_family = c("gaussian", "binomial")  
)
```

## Arguments

`data_community` Community response matrix.  
`error_family` Selected error-family name.

## Value

Named list containing the prepared community matrix and family.
