load_targets_target_fingerprints
<i>Load Target Fingerprints from a Targets Store</i>

Description

Reads and validates content hashes for exact target names in an external ‘targets’ store. The function fails closed when metadata are unavailable, incomplete, duplicated, errored, or unhashed.

Usage

```
load_targets_target_fingerprints(  
  store_path,  
  target_names,  
  meta_fn = targets::tar_meta  
)
```

Arguments

store_path	A single non-empty character string with the targets store path.
target_names	A character vector of unique, non-empty target names.
meta_fn	Function used to read metadata. Defaults to [targets::tar_meta()].

Value

A tibble with ‘name’ and ‘data_hash’, ordered by ‘name’.

Examples

```
## Not run:
load_targets_target_fingerprints(
  store_path = "Data/targets/traits_reference/pipeline_traits_reference",
  target_names = c(
    "data_traits_classified_corrected",
    "data_combined_classification_table_traits"
  )
)

## End(Not run)
```
