.resolve_sjsdm_early_stopping
<i>Resolve sjSDM Early-Stopping Patience</i>

Description

Internal helper that preserves the three-tier early-stopping semantics used by ‘fit_jsdm_model()’.

Usage

```
.resolve_sjsdm_early_stopping(iter = 100L, n_early_stopping = NULL)
```

Arguments

<code>iter</code>	Positive number of fitting epochs.
<code>n_early_stopping</code>	Requested patience or ‘NULL’ for automatic mode.

Value

Integer early-stopping patience passed to ‘sjSDMControl()’.
