Build a Manuscript Figure Palette

Description

Returns a colourblind-aware named palette for a supported scientific semantic domain. Mappings are stable across all main-analysis figures.

Usage

```
build_manuscript_palette(
  domain = base::c("variance_component", "data_source", "taxonomic_resolution",
    "continent", "availability")
)
```

Arguments

`domain`	Character scalar selecting the semantic palette.

Value

A named character vector of hexadecimal colours.
