Build an sjSDM Pipeline Artifact

Description

Builds common provenance and a validated v2 envelope at a pipeline stage boundary.

Usage

```
build_sjsdm_pipeline_artifact(
  artifact_type = NULL,
  payload = NULL,
  pipeline_id = NULL,
  configuration_profile = NULL,
  created_at = base::Sys.time(),
  stable_provenance = base::list()
)
```

Arguments

`artifact_type`	Registered artifact type.
`payload`	Exact named payload list.
`pipeline_id`	Pipeline identifier.
`configuration_profile`	Active configuration profile.
`created_at`	Finite creation time.
`stable_provenance`	Optional stable scientific provenance.

Value

Validated v2 artifact envelope.
