Build Resolution-Aware Unit Target Requests

Description

Selects targets only for eligible resolutions, preserving requested unit order. An empty request represents a wholly expected-infeasible unit.

Usage

```
build_sjsdm_unit_fitting_targets(data_preparation_plan, target_names)
```

Arguments

`data_preparation_plan`	Classified unit-resolution rows returned by fitting preflight.
`target_names`	Character vector of available resolution targets.

Value

Named list of character target vectors, one per unit.

Examples

```
## Not run:

build_sjsdm_unit_fitting_targets(data_preparation_plan, target_names)

## End(Not run)
```
