Build Spatial Grid Tiles

Description

Builds clipped regular grid tiles for one parent spatial unit.

Usage

```
build_spatial_grid_tiles(
  parent_scale_id = NULL,
  x_minimum_parent = NULL,
  x_maximum_parent = NULL,
  y_minimum_parent = NULL,
  y_maximum_parent = NULL,
  tile_size_degrees = NULL,
  scale_name = NULL,
  scale_id_prefix = NULL
)
```

Arguments

`parent_scale_id`	A non-empty character scalar identifying the parent spatial unit.
`x_minimum_parent`, `x_maximum_parent`	Finite numeric scalars giving the horizontal parent bounds.
`y_minimum_parent`, `y_maximum_parent`	Finite numeric scalars giving the vertical parent bounds.
`tile_size_degrees`	A positive finite numeric scalar giving the square tile size in degrees.
`scale_name`	A non-empty character scalar naming the output spatial scale.
`scale_id_prefix`	A non-empty character scalar prepended to sequential tile identifiers.

Value

A tibble with one row per non-empty clipped tile and the columns 'scale_id', 'scale', 'parent_id', 'x_min', 'x_max', 'y_min', and 'y_max'.

Examples

```
build_spatial_grid_tiles(

  parent_scale_id = "europe",

  x_minimum_parent = -10,

  x_maximum_parent = 40,

  y_minimum_parent = 35,

  y_maximum_parent = 70,

  tile_size_degrees = 20,

  scale_name = "regional",

  scale_id_prefix = "eu_r"

)
```
