Build Spatial Model Store Index

Description

Creates a catalogue of spatial targets stores for one data source and one or more spatial scales.

Usage

```
build_spatial_model_store_index(
  data_source,
  scales = c("continental", "regional", "local"),
  pipeline_name = NULL,
  path_spatial_grid = here::here("Data/Input/spatial_grid.csv")
)
```

Arguments

`data_source`	A single character string. Must be '"paleo"' or '"modern"'.
`scales`	Character vector of spatial scales to include.
`pipeline_name`	Optional pipeline name. Defaults to 'pipeline_data_source_spatial_resolution'.
`path_spatial_grid`	Path to the spatial grid CSV file.

Value

A tibble with columns 'data_source', 'scale', 'scale_id', 'pipeline_name', 'store_path', and 'store_exists'.
