Build Interim Trait Review Closure

Description

Converts fully investigated candidates without objective correction evidence into approved no-action decisions. Nonpositive invalid values become narrow exclusions, while corroborated scale or source patterns remain exceptions.

Usage

```
build_trait_review_interim_closure(
  data_trait_review_candidates,
  data_trait_review_decisions,
  data_candidate_triage,
  data_candidate_reconciliation,
  reviewer,
  reviewed_at,
  evidence_reference
)
```

Arguments

`data_trait_review_candidates`	Current trait-review candidates.
`data_trait_review_decisions`	Existing trait-review decisions.
`data_candidate_triage`	Programmatic candidate triage.
`data_candidate_reconciliation`	Programmatic reconciliation results.
`reviewer`	Name of the approving human reviewer.
`reviewed_at`	ISO review date.

`evidence_reference`	Path to the durable closure report.

Value

A named list containing the closure audit, new approved decisions, unresolved exceptions, and a closure summary.
