Diagnose Duplicate Modern Communities

Description

Returns modern sample records with identical sorted community composition.

Usage

```
diagnose_duplicate_communities(data_community = NULL)
```

Arguments

`data_community`	A long-format community data frame with 'dataset_name', 'sample_name', 'age', 'taxon', and 'pollen_count' columns.

Value

A tibble with one row per record involved in a duplicated community signature. Returns a zero-row tibble when no duplicate communities are detected.
