Diagnose Trait Review Candidates

Description

Produces conservative policy recommendations, targeted investigations, and exact recovered-proposal diagnostics without changing records or decisions.

Usage

```
diagnose_trait_review_candidates(
  data_candidate_evidence,
  data_record_evidence,
  data_review_decision_proposals
)
```

Arguments

`data_candidate_evidence`	Candidate evidence returned by [build_trait_review_evidence_packets()].
`data_record_evidence`	Record evidence returned by [build_trait_review_evidence_packets()].
`data_review_decision_proposals`	Recovered, unapproved atomic decision proposals.

Value

A named list containing 'data_candidate_recommendations' and 'data_proposal_diagnostics'.

Examples

```
candidate_evidence <- tibble::tibble(
  candidate_id = "candidate-a",
  n_nonpositive = 0L,
  n_nonfinite = 0L,
  historical_summary_stable = TRUE,
  implicit_none_proposal_eligible = TRUE,
  possible_unit_pattern = FALSE,
```

```
  candidate_impact_score = 0.5,
  candidate_impact_tier = "medium"
)
record_evidence <- tibble::tibble(
  candidate_id = "candidate-a",
  taxon_name = "Taxon A",
  trait_domain_name = "Diaspore mass",
  trait_value = 1,
  trait_name = "Seed mass",
  dataset_id = 1L
)
proposals <- tibble::tibble(
  decision_id = character(),
  candidate_id = character(),
  taxon_name = character(),
  trait_domain_name = character(),
  trait_name = character(),
  dataset_id = integer(),
  value_lower = double(),
  value_lower_inclusive = logical(),
  value_upper = double(),
  value_upper_inclusive = logical(),
  action = character(),
  scale_factor = double()
)
diagnose_trait_review_candidates(
  candidate_evidence,
  record_evidence,
  proposals
)
```
