Audit Completed Continental sjSDM Results for Retention

Description

Retains a legacy continental regularization decision and final model only when the final fit converged and calibrated evidence reproduces its winner.

Usage

```
evaluate_sjsdm_continental_cv_retention(
  data_completed = NULL,
  data_calibration = NULL
)
```

Arguments

`data_completed`	Completed unit-resolution rows with final convergence, legacy winner, and explicit legacy CV/final fitting budgets.
`data_calibration`	Unit-resolution calibration rows with accepted status and winning candidate.

Value

Audit table with deterministic retention decisions and reasons.
