Assess the Paired sjSDM Staged Benchmark

Description

Compares paired exhaustive and staged benchmark repetitions against the frozen issue 138 runtime, resource, technical, and scientific gates.

Usage

```
evaluate_sjsdm_staged_benchmark(

  data_benchmark_runs = NULL,

  list_policy = build_sjsdm_staged_benchmark_policy()

)
```

Arguments

`data_benchmark_runs`	One row per strategy and benchmark repetition containing measured resources, fit counts, predictive metrics, technical hashes, and selection evidence.
`list_policy`	Named list containing the versioned issue 138 acceptance thresholds. Defaults to [build_sjsdm_staged_benchmark_policy()].

Value

A named list containing paired comparisons, criterion-level gate results, and a one-row benchmark decision.
