Assess a Paired Spatial MEM Benchmark

Description

Compares exact and fast spatial MEM runs on identical repetitions against the Issue 138 technical and predictive regression allowances.

Usage

```
evaluate_spatial_mev_paired_benchmark(
  data_benchmark_runs = NULL,
  list_policy = build_sjsdm_staged_benchmark_policy()
)
```

Arguments

`data_benchmark_runs`	One row per repetition and spatial MEM strategy.
`list_policy`	Issue 138 benchmark policy. Defaults to [build_sjsdm_staged_benchmark_policy()].

Value

Named list with paired comparisons, gate results, and one decision row.
