Extract Sample Ages

Description

Extracts sample ages from an in-memory VegVault result.

Usage

```
extract_sample_ages(data_vegvault = NULL)
```

Arguments

`data_vegvault`	A data frame containing 'dataset_name' and nested 'data_samples' columns.

Details

This function extracts an in-memory component. It does not load data from persistent storage.

Value

A data frame with columns 'dataset_name', 'sample_name', and 'age'.

Examples

```
data_vegvault <-
  tibble::tibble(
    dataset_name = "example",
    data_samples = base::list(
      tibble::tibble(sample_name = "sample_1", age = 100)
    )
  )

extract_sample_ages(data_vegvault = data_vegvault)
```
