Load One Decomposition Target

Description

Internal adapter that forwards a target name and store to the injected target-reading function.

Usage

```
.load_decomposition_target(target_name, store_path, tar_read_fn)
```

Arguments

`target_name`	Target name to load.
`store_path`	Targets store path.
`tar_read_fn`	Function used to read targets.

Value

The loaded target value.
