Load a Model Evaluation Target

Description

Loads one explicit fitted or cross-validated model-evaluation target from a targets store. If the target cannot be read, 'NULL' is returned.

Usage

```
load_model_evaluation_target(
  store_path,
  resolution_id,
  evaluation_type = base::c("fitted", "cross_validated"),
  read_target_fn = targets::tar_read_raw
)
```

Arguments

`store_path`	A single character string with the targets store path.
`resolution_id`	A single non-empty character string identifying the model resolution.
`evaluation_type`	Evaluation target type. One of '"fitted"' or '"cross_validated"'.
`read_target_fn`	Function used to read the target. Defaults to [targets::tar_read_raw()].

Value

The model evaluation object, or 'NULL' if it cannot be read.

Examples

```
## Not run:
load_model_evaluation_target(
  store_path = "Data/targets/modern_spatial_continental/europe",
  resolution_id = "genus",
```

```
  evaluation_type = "cross_validated"
)

## End(Not run)
```
