Load an sjSDM CV Payload Field

Description

Reads and validates one canonical native-v2 artifact.

Usage

```
load_sjsdm_cv_payload_field(
  store_path = NULL,
  v2_target_name = NULL,
  artifact_type = NULL,
  payload_name = NULL,
  read_target_function = targets::tar_read_raw
)
```

Arguments

`store_path`	Targets store path.
`v2_target_name`	Canonical v2 target name.
`artifact_type`	Expected v2 artifact type.
`payload_name`	Payload field to return.
`read_target_function`	Injectable target reader.

Value

The requested v2 payload field.
