Load a Successful Model Target

Description

Loads a target only when its targets metadata records successful completion. Read failures are represented by 'NULL'.

Usage

```
.load_successful_model_target(
  data_meta,
  target_name,
  store_path,
  read_target_fn
)
```

Arguments

`data_meta`	Targets metadata containing target names and errors.
`target_name`	Single target name to load.
`store_path`	Targets store path.
`read_target_fn`	Function used to load the target.

Value

The loaded target object, or 'NULL'.
