Prepare Matched Paleo-Modern Plot Data

Description

Filters the matched synthesis table to finite association estimates and joins coverage counts that make unmatched-unit exclusions explicit.

Usage

```
prepare_matched_paleo_modern_plot_data(
  data_comparison_unit,
  data_comparison_coverage
)
```

Arguments

`data_comparison_unit`	Matched paleo-modern synthesis unit table.
`data_comparison_coverage`	Synthesis coverage table.

Value

A tibble containing paired estimates, their difference, and matched and excluded-unit counts for the corresponding tier and resolution.
