Prepare One Candidate's Refit Guardrail Metrics

Description

Validates and reshapes complete fold-macro repeat metrics for one candidate.

Usage

```
prepare_sjsdm_guardrail_repeat_metrics(
  data_metrics = NULL,
  suffix = NULL,
  guardrail_metrics = base::c("auc", "brier_score", "log_loss", "tjur_r2")
)
```

Arguments

`data_metrics`	Long repeat-metric evidence.
`suffix`	Suffix appended to metric columns.
`guardrail_metrics`	Required metric identifiers.

Value

One row per repeat with suffixed guardrail metrics.
