Resolve the sjSDM Fitting Device

Description

Internal helper that validates GPU runtime requirements and resolves the CPU-parallelism setting for the selected fitting device.

Usage

```
.resolve_sjsdm_device(
  device = c("cpu", "gpu"),
  parallel = 0L,
  gpu_runtime_validator = validate_sjsdm_gpu_runtime
)
```

Arguments

`device`	Selected sjSDM device.
`parallel`	Requested CPU parallelism.
`gpu_runtime_validator`	Injectable strict GPU runtime validator.

Value

Named list containing 'device' and 'parallel'.
