Summarise Pollen Counts by Sample

Description

Summarises the total pollen count for each sample.

Usage

```
summarise_pollen_counts_by_sample(data_community = NULL)
```

Arguments

`data_community`	A data frame containing 'sample_name' and 'pollen_count' columns.

Details

Missing values in 'pollen_count' are ignored.

Value

A data frame with two columns: 'sample_name' and 'pollen_sum', where 'pollen_sum' is the total pollen count for each sample.
