Summarise Spatial MEM Benchmark Predictions

Description

Converts paired exact or fast out-of-fold predictions into one benchmark row per repetition using the shared fold-local evaluation definitions.

Usage

```
summarise_spatial_mev_benchmark_predictions(
  data_predictions = NULL,
  spatial_mev_strategy = NULL,
  technical_cv_status = "pass",
  assignment_hash = NULL,
  artifact_schema_hash = NULL
)
```

Arguments

`data_predictions`	Long out-of-fold prediction table accepted by [evaluate_sjsdm_fold_predictions()].
`spatial_mev_strategy`	Spatial MEM strategy used to produce the predictions.
`technical_cv_status`	Technical status recorded for the benchmark run.
`assignment_hash`, `artifact_schema_hash`	Stable identifiers used to verify paired technical equivalence.

Value

Tibble with one row per repetition and spatial MEM strategy.
