Validate Trait Review Decisions

Description

Validates review schema, human approval, candidate coverage, selectors, and correction-rule conflicts against current trait records.

Usage

```
validate_trait_review_decisions(
  data_trait_review_decisions,
  data_trait_records,
  data_trait_review_candidates,
  data_trait_source_scale_record_audit = NULL
)
```

Arguments

`data_trait_review_decisions`	Decision data loaded by [load_trait_review_decisions()].
`data_trait_records`	Current trait records for the review stage.
`data_trait_review_candidates`	Current candidates from [build_trait_review_candidates()].
`data_trait_source_scale_record_audit`	Optional record-level audit from [apply_trait_source_scale_rules()].

Value

A tibble containing validated review decisions.
