Check Presence of VegVault File

Description

Checks whether the 'VegVault.sqlite' file exists in the specified directory.

Usage

```
validate_vegvault_presence(relative_path = "Data/Input/VegVault.sqlite")
```

Arguments

`relative_path`	Relative path to the 'VegVault.sqlite' file (default: "Data/Input/Vegvault.sqlite").

Details

Verifies the presence of the 'VegVault.sqlite' file. If not found, throws an error with instructions to consult the 'Data/Input/README.md' file.

Value

Logical value indicating whether the file exists. Stops with an error if the file is not found.
