<code>.load_decomposition_model_fitting_config</code>
<i>Load Decomposition Model-Fitting Configuration</i>

Description

Internal loader that prefers the shared configuration target and falls back to the taxonomic-resolution-specific target.

Usage

```
.load_decomposition_model_fitting_config(  
  store_path,  
  resolution_id,  
  tar_read_fn  
)
```

Arguments

<code>store_path</code>	Targets store path.
<code>resolution_id</code>	Taxonomic resolution suffix.
<code>tar_read_fn</code>	Function used to read targets.

Value

The model-fitting configuration value.
