.load_successful_model_target
<i>Load a Successful Model Target</i>

Description

Loads a target only when its targets metadata records successful completion. Read failures are represented by 'NULL'.

Usage

```
.load_successful_model_target(  
  data_meta,  
  target_name,  
  store_path,  
  read_target_fn  
)
```

Arguments

data_meta	Targets metadata containing target names and errors.
target_name	Single target name to load.
store_path	Targets store path.
read_target_fn	Function used to load the target.

Value

The loaded target object, or 'NULL'.
