add_panel	<i>Add an ORACLE terminal panel</i>
-----------	-------------------------------------

Description

Adds a framed translucent panel and optional label to an ORACLE terminal plot.

Usage

```
add_panel(  
  xmin,  
  xmax,  
  ymin,  
  ymax,  
  label = NULL,  
  panel_fill = NULL,  
  panel_border = NULL,  
  label_colour = NULL,  
  label_size = 3,  
  text_buffer = 1.2,  
  palette = NULL  
)
```

Arguments

xmin	Numeric scalar. Minimum x coordinate of the panel.
xmax	Numeric scalar. Maximum x coordinate of the panel.
ymin	Numeric scalar. Minimum y coordinate of the panel.
ymax	Numeric scalar. Maximum y coordinate of the panel.
label	Optional character scalar. Label shown inside the upper-left corner.
panel_fill	Optional fill colour. If 'NULL', 'palette[["surface"]]'

panel_border	Optional border colour. If 'NULL', 'palette[["border"]]' is used.
label_colour	Optional label colour. If 'NULL', 'palette[["muted"]]' is used.
label_size	Numeric scalar. Label text size.
text_buffer	Numeric scalar. Internal offset for label placement.
palette	Optional named character vector of ORACLE colours. If 'NULL', colours are read with 'get_oracle_palette_values()'.

Details

The returned list is designed to be added to a 'ggplot' object with '+'.

Value

A list of 'ggplot2' layers.
