build_temporal_trajectory_frame
Build Temporal Trajectory Frame

Description

Builds one animation frame for the temporal ANOVA component trajectory stacked-area plot, optionally overlaying a modularity Q line.

Usage

```
build_temporal_trajectory_frame(  
  data_plot,  
  data_modularity,  
  current_age,  
  continent_label,  
  vec_component_colours,  
  colour_modularity,  
  vec_palette = NULL,  
  font_family = "VT323"  
)
```

Arguments

`data_plot` Tibble with columns 'age', 'component', and 'component_percentage'.
`data_modularity` Tibble with columns 'age' and 'modularity_q'.
`current_age` Numeric scalar. Age at which to draw the vertical marker line.
`continent_label` Character scalar. Continent name used as the plot title.
`vec_component_colours` Named character vector mapping component names to fill colours.

`colour_modularity`

Character scalar. Colour for the modularity Q overlay line.

`vec_palette`

Optional named character vector of ORACLE colours. If 'NULL', colours are read with 'get_oracle_palette_values()'.

`font_family`

Character scalar. Font family for all text elements.

Value

A 'ggplot' object ready for one animation frame.
