| <i>Coerce Null to Missing Integer</i> |  |

---

## Description

Converts a scalar value to integer while representing 'NULL' as 'NA\_integer\_'. This is useful for optional model tuning values that are stored as missing values in CSV files but returned as 'NULL' by tuning helpers.

## Usage

```
coerce_null_to_na_integer(value)
```

## Arguments

value                    'NULL' or a scalar value coercible to integer.

## Value

A single integer value, or 'NA\_integer\_' when 'value' is 'NULL'.

## Examples

```
coerce_null_to_na_integer(NULL)
coerce_null_to_na_integer(10)
```
