detect_duplicate_communities
<i>Detect Duplicate Modern Communities</i>

Description

Detects modern sample records with identical sorted community composition.

Usage

```
detect_duplicate_communities(data_source = NULL)
```

Arguments

data_source	A long-format community data frame with 'dataset_name', 'sample_name', 'age', 'taxon', and 'pollen_count' columns.
-------------	--

Value

A tibble with one row per record involved in a duplicated community signature. Returns a zero-row tibble when no duplicate communities are detected.
