format_scss_value 1

Index 2

format_scss_value	<i>Format a design token value as a SCSS string</i>
-------------------	---

Description

Converts a scalar design token value to a character string suitable for SCSS output.

Usage

```
format_scss_value(value)
```

Arguments

value	A scalar R value from the design configuration.
-------	---

Value

Character scalar.

Examples

```
## Not run:  
format_scss_value("#00ff00")  
  
## End(Not run)
```
