read_spatial_model_results
Read Spatial Model Results

Description

Reads successful spatial model ANOVA and evaluation targets from indexed targets stores and returns one summary row per store-resolution-component combination.

Usage

```
read_spatial_model_results(  
  store_index,  
  resolution_ids,  
  read_target_fn = targets::tar_read_raw,  
  meta_fn = targets::tar_meta,  
  require_non_empty = FALSE  
)
```

Arguments

`store_index` Data frame returned by [build_spatial_model_store_index()].
`resolution_ids` Character vector of model resolution identifiers.
`read_target_fn` Function used to read one target. Defaults to [targets::tar_read_raw()].
`meta_fn` Function used to read target metadata. Defaults to [targets::tar_meta()].
`require_non_empty` Logical. If 'TRUE', error when no rows are read.

Value

A tibble with ANOVA component percentages and AUC summaries.
